

Senior Python Developer

Cloud & Data Platform Team | NexaTech Solutions

DEPARTMENT Engineering & Architecture	EMPLOYMENT TYPE Full-Time (Remote / Hybrid)
LOCATION Austin, TX / Remote (US)	EXPERIENCE LEVEL 5+ Years
SALARY RANGE \$135,000 - \$165,000 / year	REPORTS TO Lead Software Architect

COMPANY OVERVIEW

At NexaTech Solutions, we build high-throughput, low-latency data pipelines and intelligent cloud services power-driven by modern Python infrastructure. We are seeking a highly skilled Senior Python Developer to join our Cloud Engineering team to architect, build, and scale our next-generation backend microservices.

ROLE SUMMARY

As a Senior Python Developer, you will play a pivotal role in designing resilient distributed systems, developing robust RESTful APIs, and optimizing core backend workflows. You will collaborate closely with cross-functional teams including DevOps, Product Management, and Data Engineering.

KEY RESPONSIBILITIES

- Architect, write, and maintain clean, scalable, and well-tested Python code (FastAPI, Django, AsyncIO).
- Design and optimize data models using PostgreSQL, Redis, and SQLAlchemy.
- Build microservices and automated workflows deployed on AWS/GCP using Docker and Kubernetes.
- Implement robust CI/CD automation pipelines and unit/integration test suites using pytest.
- Mentor junior engineers, conduct thorough code reviews, and drive technical best practices across teams.
- Monitor, profile, and troubleshoot backend production performance bottlenecks.

TECHNICAL REQUIREMENTS & QUALIFICATIONS

- Python Mastery:** 5+ years of production experience with Python 3.9+, including deep understanding of AsyncIO, multi-threading, memory management, and typing.
- Frameworks:** Proven experience with FastAPI, Flask, or Django REST Framework.
- Database Expertise:** Strong proficiency in SQL/PostgreSQL, ORMs (SQLAlchemy/Tortoise), and caching strategies (Redis).
- Cloud & DevOps:** Experience with AWS (Lambda, ECS, S3, SQS), Docker, Kubernetes, and Terraform.
- Testing & Quality:** Hands-on experience with pytest, test-driven development (TDD), and code quality tools (Black, Flake8, Ruff).
- Bachelor's Degree:** Computer Science, Software Engineering, or equivalent practical experience.

Core Technologies Stack

Python 3.12

FastAPI

AsyncIO

PostgreSQL

Redis

Docker

Kubernetes

AWS

PyTest

CI/CD

BENEFITS & PERKS

- Competitive salary with annual performance bonus & equity options.
- Flexible remote work environment with home office setup stipend.
- Comprehensive health, dental, and vision insurance with 100% premium coverage.
- 401(k) matching up to 5% with immediate vesting.
- Unlimited Paid Time Off (PTO) and learning/conference allowance.
