

KARAMSETTY MEGHANJANI

karamsettymeghanjani@gmail.com — [LinkedIn.meghanjani](https://www.linkedin.com/in/meghanjani) — Nellore, Andhra Pradesh, 524002

CAREER OBJECTIVE

Final-year B.Tech student in Electronics and Communication Engineering with strong foundation in Data Structures, Python, and problem-solving. Experienced in C and basic Machine Learning concepts. Currently working as a Data Annotation Associate at Brown Edge Technologies. Seeking an entry-level software or data-focused role to apply analytical and programming skills.

EDUCATION

Narayana Engineering College (Nellore, Andhra Pradesh) CGPA: 9.3 / 10 Electronics And Communication	B.Tech (Oct 2022 – May 2026)
Narayana Junior College (Nellore, Andhra Pradesh) Percentage :95.1	Intermediate (2020 – 2022)
Sri Saradha E.M High School (Nellore, Andhra Pradesh) CGPA:9.8/10	SSC (2019 – 2020)

SKILLS

- **Languages:** C, Python
- **Data Analysis:** Pandas, NumPy, Data Cleaning and Preprocessing, Exploratory Data Analysis (EDA), Machine Learning Basics (Decision Tree, Classification)
- **Annotation Expertise:** LiDAR (Point Cloud) Annotation, 3D Bounding Box (Cuboid) Labeling, Image Annotation, Video Annotation, Text Annotation and Classification
- **Tools:** GT Studio, MS Excel, VS Code
- **Databases:** MySQL (Basic CRUD Operations)
- **Soft Skills:** Communication, Problem Solving, Analytical Thinking

EXPERIENCE

- **Data Annotation Associate:** Brown Edge Technology FEB 2026 – Present
Performed LiDAR (Point Cloud) Annotation, Image and Video Annotation for machine learning datasets.
Created accurate 3D bounding boxes (cuboids) for object detection and classification tasks.
Conducted frame-by-frame video object tracking to support model training.
Ensured high-quality data labeling by following strict annotation guidelines and QA standards.
Worked with cross-functional teams to maintain dataset accuracy and consistency.
Contributed to improving dataset quality for Computer Vision and AI-based applications.

PROJECTS

- **IOT ML-Based Smart Water Quality Monitoring System:** Developed a real-time IoT water quality monitoring system using Arduino, sensors (pH, turbidity, TDS, temperature) and Python Machine Learning (Decision Tree Classifier) to automatically classify water as safe or unsafe. This system provides early detection of contamination and promotes public health and sustainability.
- **Automatic Plant Watering System:** Designed an IoT-based irrigation system using soil moisture sensors and automated pumps to enable real-time monitoring and threshold-based control. The system reduced water wastage and improved efficiency and sustainability in small-scale agriculture.

CERTIFICATIONS AND TRAINING

- **Data Analytics,** Udemy(Virtual) May 2025 – July 2025
Learned data cleaning, analysis, and visualization using Python Excel
Performed exploratory data analysis (EDA) on real datasets
- **Python Programming Intern,**Nellore(Remote) June 2025 – July 2025
Completed a 4-week internship focused on Python concepts and application development.
Strengthened coding, debugging, and logical problem-solving skills through practical projects.
